Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-6, 8, 10-15, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Dobbs et al. (U.S Patent No. 5,647,539).

Dobbs et al. teach a foam nozzle comprising a tubular member (14) having one end portion constructed and arranged to fit over the spray nozzle and to receive a flow of aqueous chemical solution from an upstream to a downstream direction, a foam producing member (28) and at least one air passageway (29) extending into the tubular member. The foam producing member positioned inwardly is defined by radially extending rib members (37, 38) and the foam producing member includes a centrally positioned wall portion with the rib members extending radially therefrom (see Fig. 4 and 6). The air passageway comprises a spacing between the tubular member and the spray nozzle and channel members (spaced equidistantly from each other) communicating with the spacing (see Fig. 1) for directing air into the tubular member.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3752

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 7, 9, 16 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dobbs et al.

Dobbs et al. have all the features of the invention (as mentioned in the above paragraph), but Dobbs et al. do not mention specifically there are four channel members connecting four air openings spaced equidistantly around the tubular member. It would have been obvious to one skilled artisan in the art to have made four channel members connecting four air openings spaced equidistantly around the tubular member to introduce more air into the tubular member to generate foam.

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Mass ('227, '775) are cited of general interest.
4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thach H Bui whose telephone number is 703-305-0063 and/or 571-272-4898. The examiner can normally be reached on Monday-Friday, 7:30-4 p.m.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherbel can be reached on 703-308-1272. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
